New CD from Bajkal Records:

terje winther - **electronic regions**

Double CD release with a gigantic musical arc taking you into an electronic terrain of vast dimensions.

Electronic Regions is the new solo record from Terje Winther, a highly respected synthesizer musician from Norway. This CD is an auditorial walk through electronic forests of strange, exploring forgotten paths, otherworldly thoughts, nature and bricks of concrete.

The double CD moves through a multitude of auditory landscapes made with old and new analogue synthesizers. A combination of improvisation and sequencers develop a broad range of sounds and emotions, drawing inspiration from the time when music was visionary, grand and made for the future.

Electronic Regions is Terje Winther's second solo release with electronic music. In addition he has contributed to many electronic albums in Norway, Sweden and England. Winther has been rewarded with positive critique for his concerts, and he is invited back to England to perform a solo concert in the «Awakenings» concert series during fall of 2009.
